Just label. Let us choose.

I urge you to support and do whatever is necessary to pass HB 6519 and HB 6527 concerning genetically engineered food. I have a right to know what is in my food and the food I feed my children. I want to make the informed choice as a consumer whether I want to purchase GMO food or not. I eat my food, not a chemical company. I do not want to eat herbicides and pesticides as well as a myriad of other things I don't even know about. I am well aware of the negative health impact GMOs have and would personally choose not to purchase them. But I don't know what isn't at this point. If GMO's are fine, as the chemical companies and the FDA say, then there should not be an issue about telling us, the consumer, that these 'wonderful' things are in our food. Then WE can choose.

Please vote for HB 6519 and HB 6527. Don't be swayed by large political lobbies. Do what is right. Label it. We can choose what to buy.
